# MAJESTIC RANGES

They have quality above all others and always had.

They are the Pioneers having been built right from the start, we have each range formerlly sold as a standing advertisement.

They are better known than any stove or range in the world.

A good article is always wanted. People want them, ask for them, and know about the good qualities of them.

The MAJESTIC being the Pioneer in making the best Range for cooking ever produced. We are the Pioneer in the selling of steele ranges. We have spent a good many dollars in advertising these ranges, and we are going to spend a good many more. They have given universal satisfaction, the proof of this is; we have never lost a desirable customer once getting

him to examine the range. They were made with the first all copper reservoir ever put on a range and are the only ones today worthy of the name.

We introduced the MAJESTIC MALLEABLE RANGE and created a revolution in the sale of ranges in South West

Kansas. Now we introduce the MAJESTIC CHARCOAL RANGE to take the place of steele. They are built the same as a Loco-

motive Boiler, to stand exposure to wear, weather and heat. The body is made of genuine charcoal Hammered Bloom Iron Range sheets, because the locomotive sheet iron is more durable than steel. It is a long step from the locomotive to the range in your kitchen, but the material of which the GREAT MAJESTIC is made is the same as that used in the new big locomotives. It is of all importance in your kitchen-less repairs. The top frame work is made of malleable iron and never breaks, warps or burns out, and is so thin that you can cook without removing the lids.

During the week beginning August 28 to September 2, we will give an exhibit at our store of the great baking qualities of these ranges and we invite everybody to call in and see the range bake biscuits.

Biscuits and coffee will be served free to all from 10 A. M. to 4 P. M. every day during the week.
